Gibtelecom

Core Cloud offerings

Infrastructure-as-a-Service (IaaS)

Enterprise-grade compute and storage hosted in Tier-3 designed data centres.

Built using industry-leading hardware and an OpenStack™ cloud infrastructure framework.

24x7x365 uptime with full redundancy and multiple internet paths.

Self-service browser-based portal and orchestration APIs for fast deployment and automation.

Backup-as-a-Service (BaaS)

Cloud-based backup infrastructure management.

Scalable, secure, and location-specific data storage.

Full control of backup and recovery processes.

Disaster Recovery-as-a-Service (DRaaS)

Business continuity built in.

Replication of critical workloads to Gibtelecom's infrastructure.

Fast recovery with minimal operational disruption.

Gibtelecom

Flexible Cloud deployment models

MODEL	FEATURES
Private Cloud	Secure, dedicated environments with high availability and fast connectivity. Ideal for regulated industries.
Public Cloud	Scalable, pay-as-you-go compute resources for dynamic business needs.
Hybrid Cloud	Uses public, private and colocation services for a complete a la carte infrastructure rollout.

Why choose Gibtelecom Cloud?

- ✔ **Enterprise reliability:** State of the art data centres with built-in redundancy.
- ✔ **Global footprint:** Deploy resources in strategic international locations.
- ✔ **Self-service & API control:** Full autonomy for technical teams.
- ✔ **Integrated services:** Backup and disaster recovery built into your cloud architecture.
- ✔ **Regulatory compliance:** Private and hybrid options for sensitive industries.
