

Gibtelecom

Data Centre Co-location.

A bespoke, secure environment that's built for busy businesses.

Tier III facilities for **certified security, resilient uptime**, and **flexible deployment**.

Elevate your infrastructure without the overheads.

Skip the cost and complexity of running your own data centre.

With Gibtelecom's co-location services your servers gain access to global connectivity, robust infrastructure and endless peace of mind.

Gibtelecom

Why choose Gibtelecom co-location?

- ✓ **Purpose-built and secure:** Housed in Tier III standards data centres, with geographical diversity - compliant with PCI and ISO27001 security standards.
- ✓ **Reliable and resilient:** Built for uptime - with on-site power, environmental controls, and 24/7 security and technical staff.
- ✓ **Flexible deployment:** Choose between full cabinets, shared rack space, cages, and select the required power density according to your business needs.
- ✓ **Fully Managed Service:** You maintain control of your hardware; we manage the facility, power, security, environment, monitoring and connectivity - end to end, with remote hands and eyes available when needed.
- ✓ **Fixed pricing:** Competitive monthly rental models, with electricity and cooling included. Bandwidth bundled packages available.

Gibtelecom

Ideal for:

High-security environments needing regulated hosting.

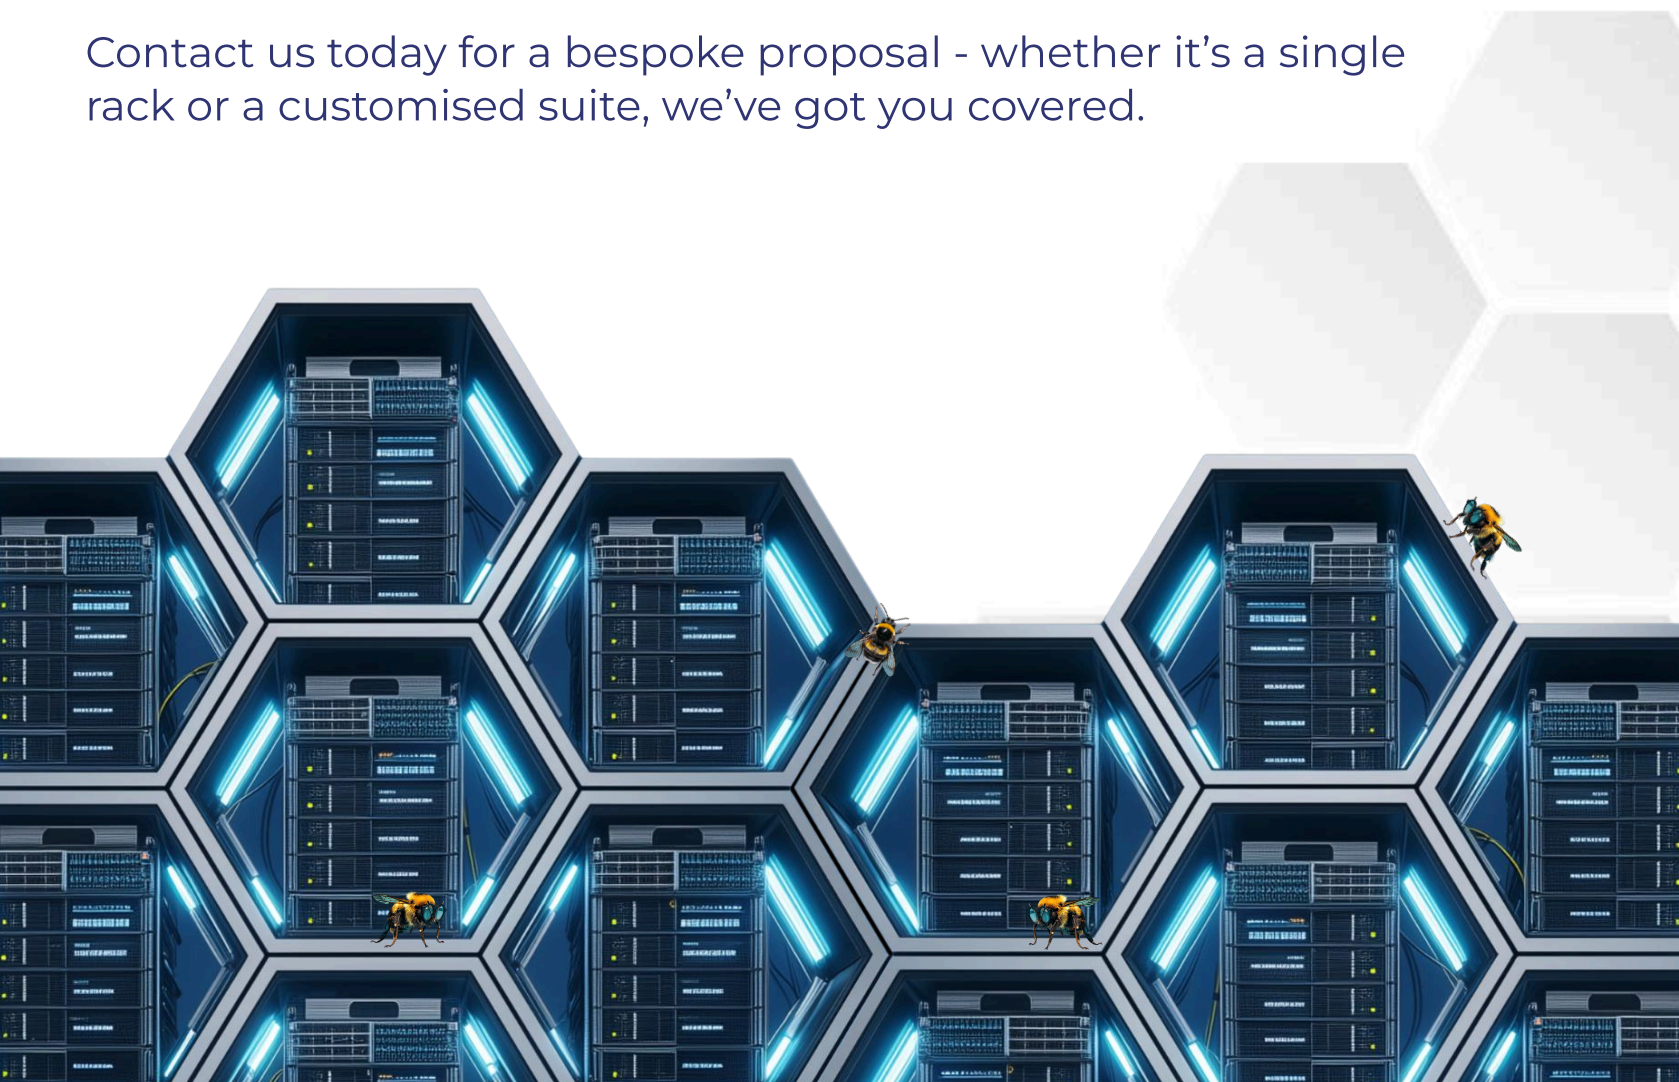

Businesses scaling IT without building physical infrastructure.

Organisations needing low-latency, globally connected hardware.

Users of mission-critical applications or sensitive data.

Ready to offload your data centre burden?

Contact us today for a bespoke proposal - whether it's a single rack or a customised suite, we've got you covered.
