Gibtelecom

Dedicated. Guaranteed. Secure.

Direct internet access connects and protects your network using a dedicated connection, while providing your teams fast, up to 1Gbps, secure and instant access to data.

Support when you need it. We're here when you need us. From installation to support 24/7.

Dedicated and uncontended bandwidth for consistent performance.

Symmetrical matching upload and download speeds.

Resilience options include diverse routing and network level separation and geographical redundancy to reduce single points of failure.

99.999% target availability.

4 hour fault repair time.

Business-grade platform with premium service quality, performance, availability targets and support.

DIA provides a wide range of speed options to suit different end-customer requirements.

Rapid and hassle-free connection setup.
