Gibtelecom

Why Managed Wi-Fi?

Elevate the experience for guests and staff

Consistent, reliable Wi-Fi can make or break first impressions. Our Managed Wi-Fi ensures visitors and employees stay connected and engaged. Poor Wi-Fi can cost businesses visits and loyalty - and a managed solution prevents that loss.

Let us handle the complexity

From site design and installation to ongoing monitoring, support, and maintenance - Gibtelecom takes the expert route.

Unlock insights, engage smarter

Customised splash pages, social/email sign-on options, and aggregated usage analytics not only streamline access - they also create new engagement and marketing opportunities.

Gibtelecom Managed Wi-Fi highlights

Full-service support

Professional installation, configuration, and 24/7 monitoring - backed by high SLAs for reliability and rapid resolution.

Smart access & onboarding

Customisable SSIDs for staff or visitors, splash pages with branding, email or social media sign-on, and web content filtering for secure, compliant browsing.

Scalable & flexible

Ideal for single venues or multi-site deployments - deploy quickly, manage easily, and scale as you grow.

Perfect for:

Retail shops, hospitality venues, and offices aiming to impress and engage.

Businesses looking to capture leads, promote offers, or share messages via Wi-Fi splash pages.

Organisations where secure, segregated access and content control are essential.

Entities scaling up operations who want a centrally managed, reliable Wi-Fi service.

Contact our team today - request a site evaluation or talk to our experts about a custom Managed Wi-Fi plan for your business.
