Gibtelecom

Flexible bandwidth. Enterprise-grade resilience.

Boost your business connectivity with a seamlessly connected business network. Enjoy point-to-point Ethernet connectivity through Gibtelecom's vast international network, spanning Europe, Asia, the Middle East, and Africa.

Benefit from fully managed, dedicated optical fibre links designed for secure, low-latency performance - ideal for time-sensitive applications and data and multimedia delivery.

Designed for you

Customise your network configuration with a variety of flexible bandwidth and resilient options.

Reliable and dependable

Fast, reliable and secure access to your systems and offices on a network built on robust infrastructure and offering protected bandwidth – trust in us for your critical business operations.

Agile and quick deployments

Consistently fast and fully managed, our dedicated and responsive teams will work to your timescales.

Global reach, local support

End-to-end oversight from planning to support with round-the-clock monitoring and proactive technical support.
