

Gibtelecom

S3 Silo Storage.

Carries the load.
Handles the heat.

S3-compatible and **locally hosted**, it's secure object storage designed to go the distance no matter the conditions, no matter the load.

Scalable. Secure. Seamless.

Gibtelecom's S3 Silo Storage is a highly scalable and secure object storage solution built to support modern data workloads, long-term archival, and application integration.

Gibtelecom

Fully compatible with the Amazon S3 API, this service enables seamless migration and connectivity with cloud-native applications, backup software, and development environments — all while keeping your data securely hosted in local, ISO27001-certified data centres.

Key features

Object-based storage

Store unstructured data such as files, backups, media, logs, or IoT data in a flat namespace.

S3 API compatibility

Connect with popular tools and platforms using the industry-standard Amazon S3 API.

Seamless integration

Compatible with backup software, analytics platforms, and development pipelines.

Data security

Data encrypted at rest and in transit. Hosted in ISO27001-certified facilities.

Scalable architecture

Instantly scale from gigabytes to petabytes with no infrastructure management required.

Geo-resilient options

Choose data residency in Gibtelecom's regional data centres to meet compliance requirements.

Pay-as-You-Go model

Predictable OPEX pricing based on actual usage – no hidden costs.

Gibtelecom

App development & testing

Easily connect object storage to DevOps environments for scalable storage solutions.

Big data & analytics

Store large volumes of raw data for machine learning and analytics pipelines.

Cloud backup & archiving

Ideal for offsite storage of backup data with cost-effective long-term retention.

Media storage & delivery

Efficient for storing and delivering large files like videos and images.

Why choose Gibtelecom?

Data sovereignty: Store data locally in your chosen jurisdiction.

High availability & durability: Built with redundancy and multi-path connectivity.

Enterprise support: Expert service desk and local technical teams.

Compliance ready: Meet GDPR, ISO27001, and industry-specific regulations.

Carrier-grade connectivity: Fast, reliable access to your data anywhere.

Start storing smarter with Gibtelecom's S3 Silo Storage - the secure, scalable alternative to public hyperscale storage.
