Gibtelecom

Secure, efficient voice connectivity

Flexible, high-quality voice connections which leverage your existing Gibtelecom broadband connection.

Key benefits:

Lower costs, greater value - Replace traditional line rentals with competitive SIP trunk pricing. Benefit from built-in conferencing and collaboration tools while consolidating your communications spend. From 6 channels to 50 channels you choose the offering that delivers the most value for you.

Exceptional voice quality & resilience - Voice traffic travels over our highly resilient private network, ensuring superior call clarity and automatic call rerouting for disaster recovery and business continuity. Redundant infrastructure options available.

Seamless, fully managed transition - We oversee your migration - testing thoroughly to guarantee seamless operation and peace of mind.

Scalable & flexible - Easily grow your SIP channel capacity as your business expands, with full control and support throughout.

Number blocks available - Whether you want 1 number, 10, 100 or 1000 we have the numbering solutions for you. MS Teams integration is also available.
